Kindergarten at Evergreen School

2025-2026

Philosophy at Evergreen School:

Kindergarten is the start of an exciting adventure for your child. At Evergreen School, each child is welcomed into their classroom as a unique individual with their own strengths, interests and passions. We are committed to supporting your child in a safe, inclusive and welcoming environment that nurtures their identity as a learner and their role as a citizen in our greater school community.

At Evergreen, we believe the acquisition of knowledge is active. Children learn best when engaged in meaningful learning experiences and working together with their peers. Your child will learn through playful approaches to developing early literacy and numeracy skills, building a solid foundation for reading, writing, mental mathematics and problem-solving. They will study and investigate as scientists - observing, asking questions, hypothesizing and testing their theories. Your child will become an active, responsible citizen through opportunities to learn about different cultures, understand perspectives and develop awareness of who they are in relation to others in their world. They will grow socially and emotionally as they learn to identify and understand their emotions, set and achieve personal goals, develop healthy relationships, and make responsible and caring decisions. Your child's curiosity, creativity and imagination will thrive through opportunities in the visual arts, music, drama and movement. Given our proximity to Fish Creek Park and our beautiful outdoor learning space, there will be many opportunities for your child to learn outside from and with the environment.

We will laugh with your child, help them solve problems, listen to their stories, celebrate their achievements, build their confidence, and support their growth as a unique learner.
